BRSR Core: Data Items under Each Attribute

Each bullet is one separate input to collect, along with the record it usually comes from.

1. GHG footprint

Scope 1 (direct emissions)

- **Stationary combustion** (DG sets, boilers, furnaces): fuel purchase invoices and consumption logs for diesel, coal, natural gas or LPG.
- **Mobile combustion** (company vehicles, forklifts): fuel card statements and vehicle logbooks.
- **Process emissions** (cement, steel, chemicals): production quantity records.
- **Fugitive emissions** (AC and chiller refrigerant top-ups, gas leaks): maintenance and service records.

Scope 2 (purchased energy)

- **Purchased electricity**: electricity bills and meter readings.
- **Purchased steam, heat or cooling**: supplier invoices.

Scope 3 (other indirect emissions across the value chain)

- **1. Purchased goods and services**: purchase ledger (spend or quantity), supplier-specific data.
- **2. Capital goods**: fixed asset register, capex invoices.
- **3. Fuel- and energy-related activities**: derived from your fuel and electricity use (upstream and T&D losses).
- **4. Upstream transportation and distribution**: freight invoices, logistics provider reports (tonne-km).
- **5. Waste generated in operations**: waste registers, recycler manifests.
- **6. Business travel**: travel agency data, expense reports (flights, hotels, taxis).
- **7. Employee commuting**: HR commute survey, shuttle or bus records.
- **8. Upstream leased assets**: lease agreements, landlord utility data.
- **9. Downstream transportation and distribution**: dispatch records, distributor freight data.
- **10. Processing of sold products**: customer or intermediate-processor data.
- **11. Use of sold products**: product energy specs x units sold x expected lifetime.
- **12. End-of-life treatment of sold products**: product weights x disposal method.
- **13. Downstream leased assets**: records of assets you lease out.
- **14. Franchises**: franchisee energy and fuel data.
- **15. Investments**: investee company emissions (mainly financial institutions).

Supporting data

- Emission factors, turnover and physical output (needed for intensity).

Where Scope 3 fits in BRSR

- BRSR Core's GHG attribute covers Scope 1 and Scope 2. Scope 3 is reported separately (Principle 6 leadership indicators, and value chain disclosures where applicable). Most companies start with the categories that matter most for their business, commonly 1, 4, 5, 6 and 7.

2. Water footprint

- **Withdrawal by source**: surface water, groundwater, municipal supply, tanker purchases, seawater, rainwater harvested. Records: meter readings, municipal bills, tanker invoices, borewell logs.
- **Discharge by destination**: surface water, groundwater, seawater, third party. Record: discharge flow meter logs.
- **Treatment level**: none, primary, secondary or tertiary. Records: STP/ETP logs and effluent test reports.
- **Consumption**: calculated as withdrawal minus discharge.

3. Energy footprint

- **Grid electricity**: electricity bills.
- **Renewable electricity**: solar or wind generation meter readings, and PPA invoices.
- **Fuels**: diesel, petrol, coal, natural gas, LPG and biomass, from purchase records. Calorific values are used to convert them to GJ.
- **Renewable share**: renewable energy divided by total energy.

4. Embracing circularity

- **Waste generated by type**: plastic, e-waste, bio-medical, construction and demolition, battery, radioactive, other hazardous, other non-hazardous. Records: waste registers and weighbridge slips.
- **Recovered** (recycled, reused, other recovery): recycler invoices, certificates and EPR records.
- **Disposed** (incineration, landfill, other): hazardous waste manifests and disposal facility receipts.

5. Employee wellbeing & safety

- **Wellbeing spend**: health and accident insurance, maternity and paternity benefits, day-care, health check-ups, safety equipment and training. Records: HR and finance ledgers.
- **Hours worked**: attendance and payroll records.
- **Lost-time injuries**: incident or accident register.
- **Fatalities and permanent disabilities**: incident reports and medical records.
- **Splits**: employees versus workers.
- **Total revenue**: financial statements, for the spend percentage.

6. Gender diversity

- **Wages paid to females**: payroll register by gender.
- **Total wages**: payroll register.
- **POSH complaints** (received, resolved, pending beyond 90 days): ICC register.
- **Female headcount**: HR records, for the complaints percentage.

7. Inclusive development

- **Purchases from MSMEs and small producers**: vendor master with Udyam registration, and the purchase ledger.
- **Purchases sourced within India**: vendor location, GST records and import records.
- **Total purchases**: purchase ledger, as the base.
- **Wages paid in smaller towns**: payroll by work location. Which towns count as "smaller" is defined in SEBI's guidance.
- **Total wages**: payroll register.

8. Fairness in engaging with customers & suppliers

- **Accounts payable**: payables ledger or balance sheet.
- **Cost of goods and services procured**: purchase ledger, for the payable-days formula.
- **Purchases by supplier**: vendor-wise ledger, to find the share going to top trading houses.
- **Sales by customer**: customer- or dealer-wise ledger, to find the share going to top dealers or distributors.

9. Openness of business

- **Loans and advances to related parties**: loan register.
- **Investments in related parties**: investment ledger.
- **Purchases and sales with related parties**: RPT register and Ind AS 24 disclosures.
- **Base totals**: totals from the financial statements, to compute the shares.

Check the exact items and formulas against SEBI's BRSR Core guidance note before using them for reporting.
